

# LARGE-CAPACITY FRONT-LOADERS

## HUEBSCH

**F**rom Huebsch comes the HCN100, a 100-pound cabinet hard-mount washer-extractor.

Three control panel overlays, a polished chrome handle and a Halo chrome door ring complement the machine's Galaxy 600™ control system, according to the company.

Its Galaxy 600 controls feature time-of-day pricing, which enables store owners to boost profitability, while 24 customizable cycles—including extra wash and rinse—provide laundry customers with options that fit their needs, the company says, adding that the feature also allows store owners to remotely access machine data and alerts through the use of a computer.

Another feature is the eBoost™ technology, which Huebsch says uses 33% less water per cycle, and reduces non-wash water below the cylinder to lower utility bills.

An extraction speed of up to 200 G-force removes more water from the load for shorter drying times and lower energy bills, the company adds.

New in 2015, the control panel overlays come in three colors—Cityscape, Citron and Slate. A polished chrome handle, now a standard offering, and Halo chrome door ring “further elevate” the machine’s look to complement a store’s design while creating an appealing environment for customers, Huebsch says.
