

PRODUCT SHOWCASE

WHIRLPOOL COMMERCIAL LAUNDRY

The Whirlpool® Commercial Laundry Front-Load Washer offers robust utility savings and user-friendly features, the company says.

It features a high-efficiency design that offers significant utility savings as reflected by its compliance with ENERGY STAR® requirements.

In addition, the large-capacity wash basket measures 3.1 cubic feet, making the washer ideal for handling family-size loads, Whirlpool says. Its door can be opened 130 degrees for easy access, and features heavy-duty die-cast hinges.

The washer features a combination of nine cycle options and variable motor speeds, Whirlpool says. Its high-speed spin extracts more water from the wash, therefore reducing dry time.

It is built with an industrial-grade cabinet that resists chip-

ping and scratches and features an integrated backsplash on top. Push-button microprocessor controls are easy to use and display time remaining.

The large-capacity metercase reduces frequency of collections and accepts a variety of payment options, including coin slide, coin drop, card reader and non-coin payment configurations.

The washer comes standard with a two-year limited parts warranty.

HUEBSCH

Huebsch® front-load washers with Galaxy™ 600 controls provide vended store owners with the ability to lower utility costs and maximize profits while ensuring the best customer experience, the company says.

The front-load washer features a cutting-edge balancing system, providing best-in-class vibration control and quiet operation, Huebsch says.

The machine's durable washtub is 20% larger than previous models, while improved water and energy efficiencies help store owners realize maximum efficiency by keeping utility bills low.

A 440 G-force extraction speed removes more moisture from each load, reducing drying time and getting customers in and out quickly, and a 10-degree tilted panel provides an "effortless" user experience.

Advanced Galaxy 600 controls allow store owners to retrieve and analyze performance data from any Internet-connected device.

Built with premium materials and tested to meet the demands of the harshest

vended environments, the Huebsch front-load washer is engineered for maximum performance and comes with the brand's standard three-year warranty.

ELECTROLUX PROFESSIONAL

Electrolux Professional offers a full range of solid- and soft-mount washers designed with the latest technology and unique money-, water- and energy-saving features, says distributor Laundrylux. The washers

are precision-engineered to increase store profits and generate customer loyalty.

They come standard with these features:

- AWS (Automatic Water Savings), which saves as much as 50% on water usage
- Compass Pro, offering customizable wash programs, including water levels, temperatures and drum action. The control displays two languages simultaneously.
- Real-time clock for time-of-day/"happy hour" pricing
- Sanitizing Rinse for generating additional store revenue
- Voice Guidance and Text Messaging Systems generate customer loyalty and provide unique marketing opportunities

Electrolux Professional washers are available in capacities ranging from 18 to 135 pounds. Its soft-mount washers spin out at 450 G-force extraction, which results in savings in time and gas in the dryer.

Electrolux store owners report utilities at 9-11% and lower construction costs, Laundrylux says.
